LETTER TO STAKEHOLDERS

Dear Stakeholders,

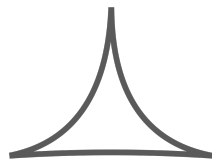

Long awaited and highly anticipated, ENWEZOH sets the stage for the ultimate mobility solution in a safe, efficient, accessible format for stakeholders invested in balancing the pillars of sustainability. This is a unique opportunity for the business of moving people in an environmentally friendly manner.

In America, we move between urban and suburban areas frequently. Moving from here to there—we journey across land, water, and air. Business, pleasure, traveling between destinations—this requires energy. As the future approaches, we know the stakes are high.

In regards to universal application, the design of ENWEZOH eclipses all mobility solutions to-date. ENWEZOH is a first class, clean-energy powered vehicle system. Explore Earth's lands, maritime waters, and the skies above in full glory.

We can go everywhere safely and anywhere efficiently. Working together, we develop transportation services for navigating Earth. Accelerating transformation, we focus on people, profit, and planet. That's sustainable mobility.

From yours truly,
Brandon EnWezoh

ABOUT

A Disruptive Mobility Solution: ENWEZOH is a vehicle system that leads sustainable mobility to new echelons. The first cross-platform vehicle that supports the movement of Americans across land, maritime, and aviation domains. This is a scalable solution with the potential to improve in an exponential way. A necessary vision. A driving innovation. A key collaboration between systems designers, architects, and engineers. A sustainable balance of people, profit, and planet.

The Future of Sustainable Mobility: ENWEZOH exhibits the attributes we need. Safety, efficiency, accessibility and is environmentally friendly. Everything a viable business model needs to meet user expectations and benefit stakeholders.

A Pacific Northwest Innovation: The Pacific Northwest is known for high-tech innovation and industry-leading performance. This is the land of cutting-edge computer science and the best aerospace engineering in the world. The region's affordable electricity is perfect for automated manufacturing processes and providing the highest value-add possible. ENWEZOH is made in America.

LEADERSHIP

Brandon EnWezoh is a solutions guy known for developing award-winning innovation and bringing visionary systems design to the world. He is experienced in construction, software, and entrepreneurship. He is from America and his laser-focus on uplifting humanity is a great investment for our future.

*"It's about making the world a better place by improving transportation methods."
Brandon EnWezoh, Founder*
