

“Summon a ride anywhere.”

ENWEZOH

Balancing the three pillars of sustainability: people, profit, and planet.

Key topics

- Benefiting stakeholders of all three pillars of sustainability
- Moving *millions* of **people** by meeting user expectations
- Earning *billions* in **profit** from supporting viable business
- Saving *one planet* through accelerating mobility transformation
- Uniting the interplay between urban and suburban environments
- Improving mass transportation in an exponential way
- Exhibiting safety, efficiency, accessibility, and eco-friendliness

ENWEZOH's purpose

Futuristic mass transportation service

What if we could **go** everywhere and anywhere sustainably?

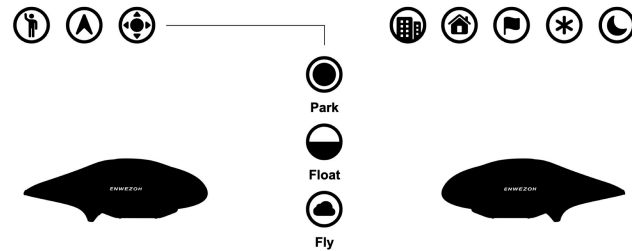

ENWEZOH is the new mass transportation technology solution

To provide good, clean, sustainable transportation services

How ENWEZOH works

Vehicle system for moving in land, maritime, and aviation domains

ENWEZOH

VEHICLE SYSTEM

What is ENWEZOH?

Value proposition

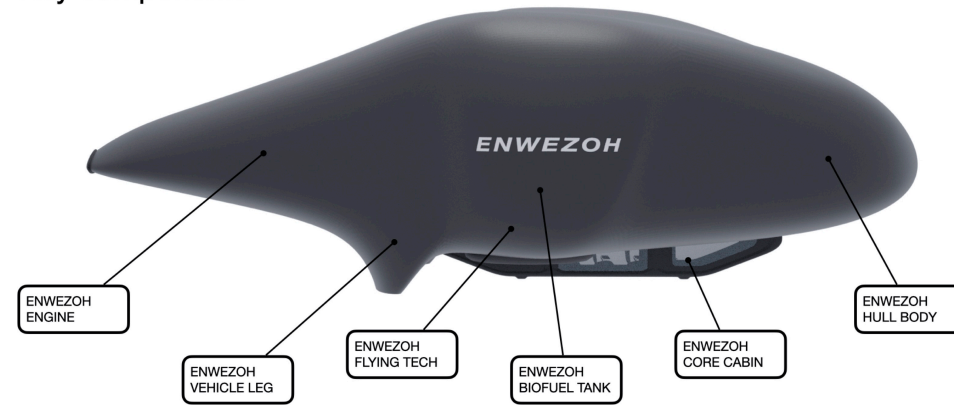

ENWEZOH is a **cross-platform vehicle system**

- Easy-to-use **intuitive features** that exceed user expectations
- Beautiful **scalable integrations** designed to support a viable business model
- Powerful **clean energy** aligned with the passenger experience

“A disruptive mobility solution.”

ENWEZOH

Key components

ENWEZOH

Details

- Cross-platform vehicle for mass transportation
- First-of-a-kind sustainable mobility (uses clean energy)
- Operates at various altitudes (land, maritime, aviation)
- Long-endurance time (levitates for up to 23 days unrefueled)
- A new standard in completely driverless systems
- Go everywhere and anywhere
- Made in America

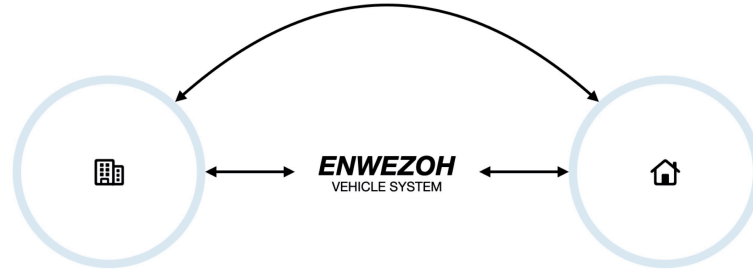

ENWEZOH
VEHICLE SYSTEM

"This is versatility."

Cross-platform mobility

Uniting the interplay between urban and suburban environments

Urban Communities

Suburban Areas

Multiple modes

Optimize for moving people, carrying equipment, or delivering cargo

Urban Mode

Suburban Mode

Cargo Mode

ENWEZOH
VEHICLE SYSTEM

“Unlocking the world.”

Innovative features

Accessible, accommodating, and easy for travel

Portable / Detachable Vessel

- Self-contained vessel
- Air mobility (connect into place)
- Sensory touch controls

100% Security (Zero Risk)

- Safe robust design (i.e. no sharp edges)
- Integrates efficiently with infrastructure
- Seamless pickup and drop-off functionality

Innovative mass transportation solution

Full-stack solution for land, maritime, and aviation domains

- Potential for stakeholders to achieve unique access to new business
- Summon a ride anywhere (parks on land, floats on water, and flies high)

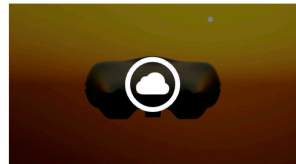

Park

Float

Fly

Transportation's Total Addressable Market in 2023 (\$ Trillions)

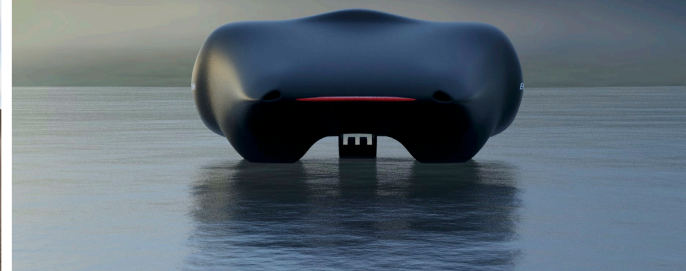

Land

ENWEZOH

VEHICLE SYSTEM

“100% of Americans want transportation choices.”

Universal application

Disruptive mobility solution

Potential to improve in an exponential way

A future of innovation

The vision

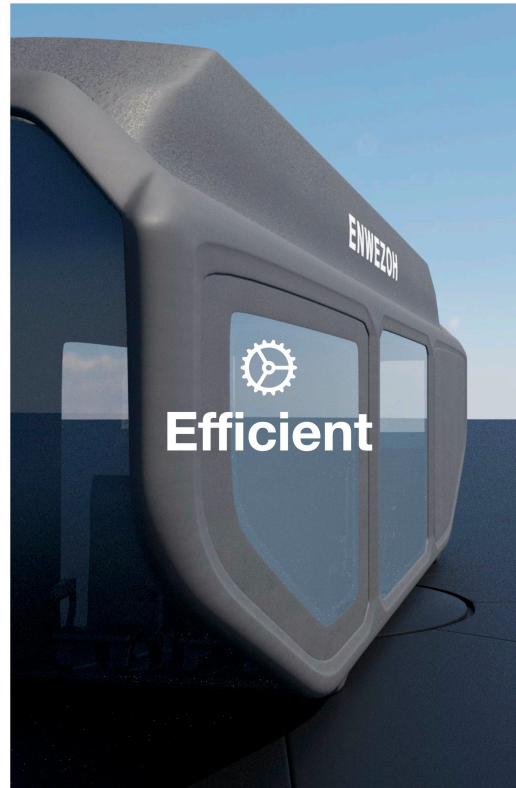

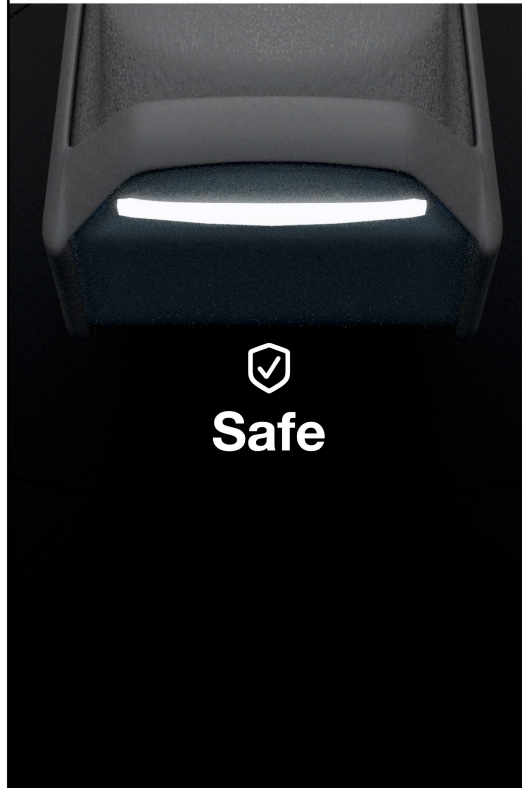

- Software-defined vehicle (service-driven mobility)
- Digital mobility service (connected, enabled)
- New mobility services (ride-hailing, AI driving)
 - Vehicle-to-everything (V2X)
 - Vehicle-to-vehicle (V2V)
 - Vehicle-to-infrastructure (V2I)
- Mobility technology (intermodal mobility, global mobility)
- Intelligent navigation system (analytical, predictive routing)
- Platform business (automated, cashless, delivered anywhere)

Evolving platform

Optional upgrades

	Stage I	Stage II	Stage III
Level 1	AI system for parking on land, floating on water, and flying in air	Improved land capability for vessel (attachable chassis with wheels)	Support for linking to sky railway
Level 2	Fully autonomous system and unmanned operation	Enhanced capabilities and functionalities with drone units	Off-world grade mass transportation

ENWEZOH
VEHICLE SYSTEM

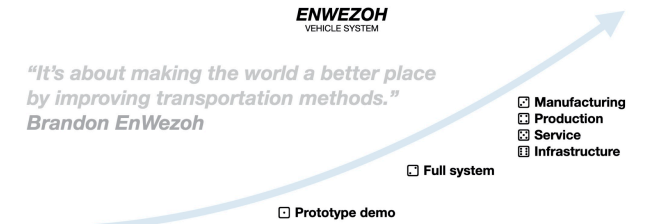

"The future of sustainable mobility."

Leverage multiple technologies

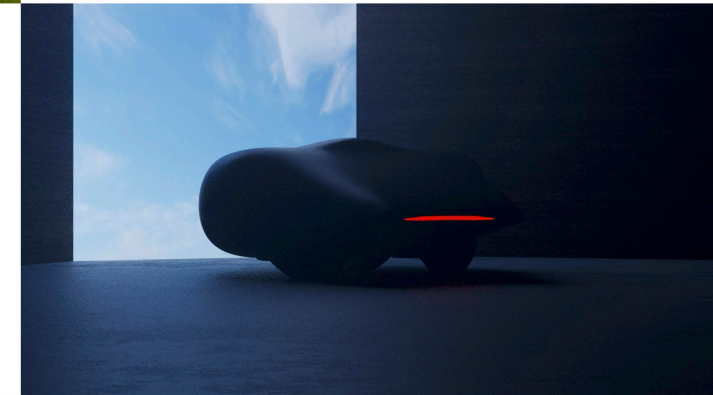

Bringing ENWEZOH to market

Proposed mass production launch trajectory

Laser-focused engineering

Overview	
Type	Cross-Platform Utility
Manufacturer	EnWezoh Vehicle System
Model	Production 1
Class	Mass Transportation
Materials	100% Sustainable
Status	Concept
Technical Specifications	
Length	30.5m (100ft)
Width	23.5m (77ft)
Height	10m (33ft)
Payload	10,000kg (22,000lb)
Cost	\$ TBD

Why make this deal?

ENWEZOH provides good, clean, sustainable mass transportation for stakeholders

Key takeaways about ENWEZOH:

- Scalable innovation in mass transportation (disruptive innovation)
- Safe, efficient, accessible, and eco-friendly (meet user expectations)
- Generates new business and revenue opportunities (earn profit)
- Industry trends suggest sustainable mobility is critical (save the planet)
